---

"Maqam / Makam - Mode" App is a guiding tool for iOS and Android which provides the basic characteristics of four music traditions. The Arabic Maqam, Turkish Makam, Byzantine Modes and Greek folk/ Urban Modes have several different features while sharing many common characteristics/ qualities. In "Maqam / Makam – Mode" App, all these similarities and differences are presented in a simple way in order for the user to have a clear understanding/ overview of these four music theory systems as they are taught today.

- How can someone use "Maqam/Makam – Mode" App to improve music performance?
- How does the user get, through the application, a more complete picture of the way in which the four traditions differ from each other in their main characteristics while at the same time they have a common axis of melodic development?
- How does this application help a student, professor or researcher, singer or organist, to understand the different systems of theory in order to use them in their personal work field (music performance or research)?

The application presents separately subdivisions of the octave, intervals, structure and development, base, dominant tone and melodic direction for 24 Turkish makams, 23 Arabic maqams, 14 Greek folk / urban modes and additionally for the modes/echoes of Byzantine music, intonation formulas, attractions and cadences as well as the comparison of these theory systems.
